Education

University of Massachusetts Amherst

MS COMPUTER SCIENCE

USA

Aug 2023 - July 2025

• CGPA: **4.0/4.0**

• Relevant coursework: Reinforcement Learning, Responsible AI, Natural Language Processing, Intelligent Visual Computing

Indian Institute of Technology Hyderabad (IIT-H)

BACHELOR OF TECHNOLOGY IN ELECTRICAL ENGINEERING WITH MINOR IN COMPUTER SCIENCE AND ENGINEERING

India

Jul 2017 - June 2021

• CGPA: **8.8/10.0**

• Relevant coursework: Algorithms, DBMS, Pattern Recognition, Machine learning, Image processing, Representation Learning

Work Experience

Google

GRADUATE STUDENT RESEARCHER

USA

Feb 2024 –

• Sampling diverse sequences in parallel from large language models via Arithmetic Sampling.

Bosch (BGSW)

SENIOR ENGINEER (RESEARCH SCIENTIST)

Bangalore, India

Aug 2021 – July 2023

- Spearheaded research in *responsible AI*, focusing on comprehensive vulnerability assessment, robustness, explainability, fairness, and drift detection across diverse domains, including computer vision, time series, speech and language models.
- Pioneered groundbreaking research in AI privacy and security, developing novel attack and defense strategies against various threat models, encompassing *adversarial attacks*, *poisoning*, *model extraction*, and *inference attacks*.
- Played a pivotal role in the early phases of securing large language models (LLMs), specializing in countering jailbreaking and prompt injection attacks, laying the foundation for the creation of the AIShield Guardian application.
- Cultivated strategic partnerships with industry leaders in healthcare, automotive, and financial services, including Whylabs and ClearML, fostering collaborative innovation.
- Architected microservices, pipelines, and logging systems for Bosch AIShield product, showcasing expertise in designing robust and scalable systems.

GE Digital

SOFTWARE DEVELOPMENT INTERN

Bangalore, India

May 2020 – July 2020

- Enhanced GE's web translation application by migrating existing pipeline based on XML and JSON to a modern deep learning architecture based on sequence-to-sequence models including *encoder-decoder with attention*, and *transformers (BERT)*.
- Built and deployed scalable REST APIs with Flask and integrated seamlessly with frontend web interfaces to enable low-latency translation.

Publications & Preprints

[1] Targeted attacks on Time Series Forecasting

YUVARAJ GOVINDARAJULU, AVINASH AMBALLA, PAVAN KULKARNI, MANOJKUMAR PARMAR

arxiv preprint

2301.11544

[2] Discrete Control in Real-World Driving Environments using Deep Reinforcement Learning

AVINASH AMBALLA, ADVAITH P, PRADIP SASMAL, SUMOHANA CHANNAPPAYYA

arxiv preprint

2211.15920

[3] Automated Model Selection for Tabular Data

AVINASH AMBALLA, ANMOL MEKALA, GAYATHRI AKKINAPALLI, MANAS MADINE, PRIYA YARRABOLU, PRZEMYSŁAW A. GRABOWICZ

arxiv preprint

2401.00961

Patents

[1] A Method to detect AI poisoning attacks from the Data and/or Model

AVINASH AMBALLA, YUVARAJ GOVINDARAJULU, MANOJKUMAR PARMAR

IN Patent App.

202241068482

[2] A Method of Targeted Attack on Timeseries Models to alter the DIRECTION of the Output

YUVARAJ GOVINDARAJULU, AVINASH AMBALLA, MANOJKUMAR PARMAR

IN Patent App.

202241065028

[3] A Method of Targeted Attack on Timeseries Models to alter the MAGNITUDE of the Output

YUVARAJ GOVINDARAJULU, AVINASH AMBALLA, MANOJKUMAR PARMAR

IN Patent App.

202241065034

[4] A Method of Sponze attack on Deep Learning Models to increase the inference time

AVINASH AMBALLA, YUVARAJ GOVINDARAJULU, MANOJKUMAR PARMAR

IN Patent App.

in progress

Research Projects (Research Assistant)

AlphaConnect-4

PROF. VINEETH N BALASUBRAMANIAN (IIT-H)

Jan 2020 - Apr 2020

- Inspired by deep mind's AlphaGo, implemented competitive *multi-agent Reinforcement Learning* on connect-4 environment.
- Utilized a combination of *Monte Carlo Tree Search (MCTS)* for opponent modeling and *Actor Critic* for agent reinforcement (single agent and single opponent). Designed the connect-4 game environment as well.
- Achieved impressive results by training the agent on low-dimensional board games and successfully applied transfer learning techniques to enable the agent's performance in higher-dimensional environments, all with minimal additional training.

Gyro Correction in IMU sensors

PROF. K SRI RAMA MURTY (IIT-H), DRDO INDIA (DEFENCE RESEARCH AND DEVELOPMENT ORGANISATION)

Apr 2021 - Jul 2021

- Spearheaded the creation of a gyro correction model for IMU sensors to mitigate noise and axis misalignment issues.
- Leveraged diverse architectural approaches, including *DB-LSTM*, *LSTM with attention mechanisms*, and *Transformer Encoder* coupled with Huber Loss, while conducting rigorous training on the EUROC dataset.
- Through *hyperparameter optimization*, achieved superior performance with attention-based models (Transformers), surpassing the capabilities of existing Dilated CNN methods in this domain.

Explaining Adversarial Robustness

PROF. ADITYA T SIRIPURAM (IIT-H)

Jan 2021 - Apr 2021

- Visual Explanations: Employed variants of *Grad-CAM* and *GRAD-FAM* techniques to produce insightful visual explanations for adversarial samples. Analyzed the behaviors of Convolutional layers to enhance model interpretability and robustness.
- Frequency Domain Analysis: Conducted in-depth research into the frequency domain analysis of adversarial examples employing *Fourier transforms* and *filters* for MSIST and CIFAR-10 datasets
- Complex-Valued Neural Networks: Currently involved in ongoing research focused on explaining adversarial examples within a frequency and complex space using *complex valued neural networks*.

ViCaP: Video Captioning And Prediction

PROF. ADITYA T SIRIPURAM (IIT-H)

Sep 2020 - Dec 2020

- Implemented a *vision-language* video captioning method utilizing convolutional encoder with a attention based decoder
- Engineered a three-step search algorithm, employing Optical Flow techniques, to predict missing frames within video sequences. Additionally, exploited conditional *Generative Adversarial Networks (GANs)* for further frame prediction accuracy.
- Currently expanding capabilities in predicting missing frames within videos by exploring *self-supervised learning*.

medium.com/@amballaavinash

[3] Graph Compression by BFS: An Overview

github.com/AmballaAvinash

Skills

Coding	C, C++, Python, Java, R
AI/ML	Tensorflow, PyTorch, Keras, Scikit-learn, OpenCV, pandas, openAI gym, aif360
Web Dev	HTML, CSS, JavaScript, jQuery, flask, Node.js, Express.js
Misc.	PostgreSQL, Azure, Git, Docker, Elasticsearch, Nginx, Unity

Teaching

- 2020 **Research Assistant** under Prof. Sumohana S Channappayya and Prof. Aditya Siripuram at IIT-H
- 2019 **Teaching Assistant** for the course Digital Signal Processing under Prof. K Sri Rama Murty at IIT-H

Achievements

- 2022 **Promising Startup and Global Info Sec award** for Bosch AIShield at Bosch FitFest
- 2022 **Runner-Up** Tinkerer's Lab Competition on AI at IITH
- 2018 **Appreciation for my work on Digital Pencil** at the prestigious Inter IIT Tech Meet - 2018
- 2017 **Ranked 12th nationwide** in the KL University exam and received a prize worth 75k INR

Service

- 2023-24 **Core Member of UMass** Data Science Club
- 2018-19 **Core Member of IITH** Elektronika(Electronics, AI Club) and Cepheid(Astronomy, Astrophysics Club)
- 2018-19 **Coordinator of Security** at IIT-H tech and cultural fest "ElanNvision"
